Subject: Microsoft Settlement

Computing technology changes very rapidly. (I know I have been in computing for 40 years.) Dominant companies that do not keep up, or drop the ball find themselves in oblivion. You cannot blame the demise of DEC, Digital, Univac, NCR, and others on Microsoft.

Please Let Microsoft innovate. It's very important to computing. If others cannot keep up, penalizing Microsoft will not give them an advantage; it'll just hold the whole industry back.

Sincerely,

Alex Zakson
